| 3. Presentation content was well organized and presented clearly | 4.50 |
| 4. Overall Assessment of the Session | 4.55 |
- Loved this session. Great information for anyone—right on track for what I needed in my life. I think anyone would find value in this session.
 - Outstanding. So impressed. Forward thinking. Had personal and professional implications.
 - Great session. Unique and interesting.
 - Interesting.
 - This session needed more time to fully understand explore ex: (emotional intelligence). Would have like to have had more time.
 - I enjoyed a lot the session, it was refreshing and different.
 - Intriguing and refreshing.
 - Needed more time to discuss application to Exec Ed, but very relevant on a personal note.
 - Outstanding-innovative-content. I've never seen before, engaging and thought provoking.
 - Information was too elemental-can get such an experience through yoga, meditation, mindfulness, prayer, spirituality—not something of value to add to an Exec Ed program. Also, cross-cultural implications, may be relevant for Euro-North American experience, but not for Asian, Middle Eastern, and African societies.
 - This was the best, most engaging and relevant session thus far. Thanks for including this.
 - Very enjoyable! Recommend all conferences have a similar wellness type of session. Re: energizes the body, (schedule after lunch).
 - Excellent presenter. Very good practical exercises I can start using today, only lacking factor was how to apply this to our program participants and/or staff.
 - Wish we had more time! This was extremely interesting. Would be great to always include something “from the fringe” to expand our horizons.
